COMMONWEALTH BANK'S AGILE COACHES LEADS AN INTENSIVE WORKSHOP
THIS JUNE: **THE BENTO BOX CHALLENGE**

SYDNEY

Wed 21 June 2017
Hilton Hotel
488 George St,
Sydney

REGISTER

Earlybird: \$600 prior to 10
April 2017
Standard: \$800
conference@agileaustralia.com.au

What if there was a way to help your team get unstuck, do better, collaborate better, innovate more and live to their potential? How do you combine prototyping, experimentation and facilitation techniques in a scaled environment to build a cohesive product beyond the limits and mental models of one team? And most importantly, what can you do within your circle of influence to foster this thinking and help your teams and organisation to move forward?

This facilitated workshop enables you to unleash your creative side and engage with multiple teams to collaborate, ideate, prototype, experiment, and co-create a multi-media training product based on your practical learning on the day.

You will start the day as individuals, work together as scaled teams over 5 iterations and finish as a cohesive unit with a finished Bento Box product that has a balanced selection of new concepts, techniques and skills, to take away to your training environment, be brave and register for this unique opportunity.

SITUATED KNOWLEDGES: THE SCIENCE QUESTION IN FEMINISM AND THE PRIVILEGE OF PARTIAL PERSPECTIVE

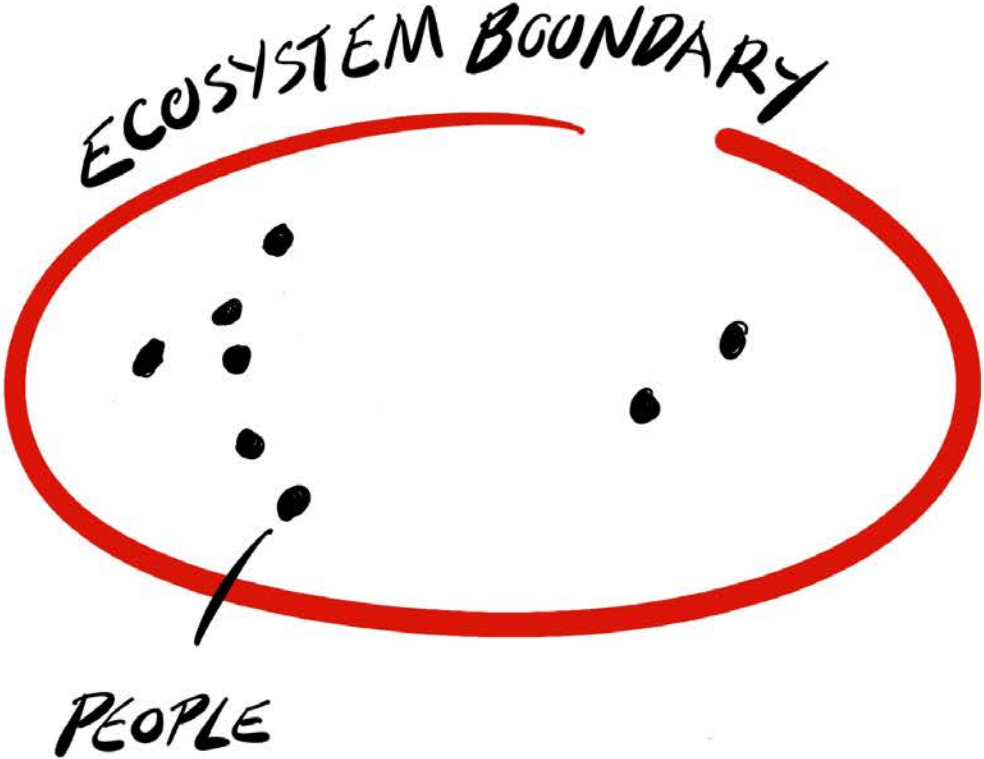

DONNA HARAWAY

Academic and activist feminist inquiry has repeatedly tried to come to terms with the question of what we might mean by the curious and inescapable term "objectivity." We have used a lot of toxic ink and trees processed into paper decrying what *they* have meant and how it hurts *us*. The imagined "they" constitute a kind of invisible conspiracy of masculinist scientists and philosophers replete with grants and laboratories. The imagined "we" are the embodied others, who are not allowed *not* to have a body, a finite point of view, and so an inevitably disqualifying and polluting bias in any discussion of consequence outside our own little circles, where a "mass"-subscription journal might reach a few thousand readers composed mostly of science haters. At least, I confess to these paranoid fantasies and academic resentments lurking underneath some convoluted reflections in print under my name in the feminist literature in the history and philosophy of science. We, the feminists in the debates about science and technology, are the Reagan era's "special-interest groups" in the rarified realm of epistemology, where traditionally what can count as knowledge is policed by philosophers codifying cognitive canon law. Of course, a special-interest group is, by Reaganoid definition, any collective historical subject that dares to resist the stripped-down atomism of Star Wars, hypermarket, postmodern, media-simulated citizenship. Max Headroom doesn't have a body; therefore, he alone sees everything in the great communicator's empire of the Global Network. No wonder Max gets to have a naive sense of humor and a kind of happily regressive, preoedipal sexuality, a sexuality that
